

## **Hospital Implementation Checklist**

### **Planning and Stakeholder Engagement**

- ☐ Meet with hospital leadership to seek necessary approvals for project rollout
- ☐ Form implementation team
- ☐ Establish supply chain (storage, distribution points, and tracking) and method of dissemination for bracelets and patient-facing educational materials
- ☐ Build clinical response pathways
- ☐ Engage community partners
- ☐ Engage hospital/system marketing and communications teams early to align on provider and patient messaging and plan internal and external communications and outreach efforts

### **Provider Trainings**

- ☐ Train hospital staff on urgent maternal warning signs, bracelet meaning, and response protocols; provide refresher sessions for ongoing reinforcement
- ☐ Develop training schedule for newly onboarded hospital staff
- ☐ Share recorded webinar with ED and EMS staff to educate about urgent maternal warning signs and patient triage
- ☐ Share recorded webinar with community-based healthcare providers to train on referral pathways and patient education

### **Patient and Family Education**

- ☐ Place bracelet on patient's wrist and provide informational handout before they leave the hospital; verbally review urgent maternal warning signs with patient and family
- ☐ Include educational patient materials in discharge packets
- ☐ In partnership with CHA and the CPQC, share materials through WIC, home visiting programs, community baby showers, doulas, public health clinics, and other community outreach sites
